WORK EXPERIENCE

Fisherman

Scarborough Harbour - 2011 to 2012

Following my apprenticeship I secured employment on The Main Prize - a fishing trawler out of the Harbour at Scarborough. I placed fishing equipment, including nets and traps, into the water; maintained and repaired onboard equipment including vessel engines and fishing gear; removed catches from equipment and measured them to ensure they complied with legal size and quotas; loaded and unload the vessel equipment and supplies, by hand or using hoisting equipment and maintained a safe and clean working environment at all times to adhere to all health and safety legislation. The trawler was involved in ensuring that other vessels maintained safe distances from seismic testing that was taking place in the vicinity.

Apprentice Fisherman

Whitby Fishing School - Whitby - 2010 to 2011

As an apprentice fisherman I learnt all of the main aspects of sea fishing including: survival in the water during maritime emergencies; emergency first aid in response to maritime accidents or medical emergencies; maritime fire prevention and fire actions; maritime security; communicating using equipment and visual means; environmental health and safety practice; vessel rope work and anchoring and mooring operations; securing a vessel for passage; assisting with a vessel's navigational watch; a vessel's construction and stability; assembling, operating and maintaining fishing gear and receiving handling and stowing the catch on a fishing vessel.

Trainee

East Cleveland Youth Housing Trust - Skinningrove - 2009 to 2010

As a trainee I helped in the renovation of various properties in the local community. I carried out painting and decorating duties on various projects - e.g. local churches and other community buildings; plastering duties as required and general labouring duties.
